

The Combined POWER of Kyocera and MyQ

MyQ works closely with Kyocera branches worldwide to deliver its unique personalized solution that leverages Kyocera's HyPAS™ technology, routing paper documents cost-effectively into efficient digital workflows.

5 reasons
why you need
to start
using MyQ
today!

1. **MyQ IS EASY TO INSTALL AND CONFIGURE**
 - Remote installation, automatic printer discovery
 - User import
2. **SYSTEM MANAGEMENT**
 - Unique personalized Embedded Terminal
 - Admin dashboard and centralized monitoring
 - Settings user policies on multiple levels
3. **ACCOUNTING AND REPORTING**
 - Advanced accounting and reporting
 - Detailed reporting and cost management
 - BI tools compatibility
 - Credit recharge and quota accounting
4. **FLEXIBILITY WITH MOBILE PRINT**
 - Touchless authentication for Print&Follow
 - Print job management with the MyQ Mobile App
5. **AVAILABILITY AND RESILIENCY**
 - Client spooling
 - Failover printing options
 - Device spooling and offline login

One of MyQ's strongest suits is the **personalized control panel** – the MyQ Embedded terminal. Functions displayed on the printer's screen after logging in can be set to correspond to jobs the user needs most often. The user can also change printing options before releasing their file, e.g. number of copies, duplex, color, staple, punch. **Ease of use goes a long way towards saving time and money!**

What other unique synergies do MyQ & Kyocera offer?

Touchless Mobile Print

In addition to classic login options (PIN, password, ID/proximity card, or a combination for multi-factor authentication), the MyQ X terminal offers **touchless QR login** with the use of the **MyQ X Mobile Client**. The user can prepare jobs in their app, submit new ones, change printing options and release them quickly by authorizing at the device using the app. They can also print from history, recharge credit or generate a new PIN – all without need to touch the device panel.

Powerful Scanning Capabilities

Documents can be converted to searchable PDFs and editable MS Office formats. **With just one click, the Easy Scan function** lets the user scan to popular Cloud services such as Dropbox, SharePoint, Google Drive and others, which makes the availability of scanned documents and collaboration with colleagues easier than ever before. Or you can also use the MyQ X Ultimate Edition to transform your device into the **front desk of your digital office!**

Secure Pull Print (Print&Follow)

Submitted documents literally follow users around. They can comfortably print their files at any multifunction device in the network equipped with a MyQ Embedded terminal. Sent from a PC, tablet or smartphone, all data waiting to be printed is encrypted and safe until released upon the user's **identity authentication**.

Device Spooling and Offline Login

Server maintenance or crashes do not threaten workflows at all. Customers can use this feature to be able to **send print jobs directly to the printer** when the print server is unavailable. Once the server is online again, all accounting data is back-synchronized.
